Janet Liu

Boston, MA 02118 | 781-999-3325 | liu.jane@northeastern.edu

Education

Northeastern University, Boston, MA — Anticipated Graduation: May 2028
Bachelor of Science, Data Science & Psychology | GPA: 4.0 (Dean's List)

Relevant Coursework: Human-Computer Interaction (Graduate Level), Database Design, Mathematical Foundations of AI, Advanced Programming with Data, Information Presentation & Visualization, Statistics for Psychological Research, Cognition

Awards, Fellowships, & Grants

Microsoft AI in Healthcare Builder Blitz Hackathon (1st Place)	2026
Northeastern University PEAK Fellowship – Summit ($1,500)	2026
NSF Research Experience for Undergraduates – Carnegie Mellon University ($7,400)	2026
Northeastern University PEAK Fellowship – Base Camp ($750)	2024
John Martinson Honors Scholarship ($96,000)	2024
Women's Empowerment Scholarship ($2,500)	2024

Research Experience

REU Intern | Advisors: Dr. Vincent Aleven, Dr. Conrad Borchers — Pittsburgh, PA
Carnegie Mellon University, Human-Computer Interaction Institute, CATS Lab — *May 2026 – Aug 2026*
Project Title: A Classroom Study Comparing an Intelligent Tutoring System with Goal Support to Paper Practice

- Built data pipelines and multi-level statistical models (R, Python) to analyze large-scale behavioral log data from an online learning platform, uncovering patterns in user engagement and outcomes
- Designed and validated interaction and mixed-effects models to test causal hypotheses about intervention effects on user behavior at scale
- First-authored a research manuscript studying the combined impact of cognitive and motivational support on middle school math learning gains and rates

PEAK Fellow | Advisors: Dr. Zhenghan Qi, Brynn Siles — Boston, MA
Northeastern University, Institute for Cognitive and Brain Health, QLAB — *Jul 2024 – Dec 2025*
Project Title: Phonemic Serial Recall Task's Reliability and Applicability for Measuring Children's Language Capabilities

- Designed and conducted an independent research study investigating the reliability and language skill applicability of a novel phonemic statistical learning task
- Managed project timeline, budget, study protocol development, and deliverables
- Recruited and collected linguistic data from 37 child participants
- Designed and presented research poster at two symposiums

Project Title: Predicting Language and Literacy in Autistic Children Using Statistical Learning

- Collected linguistic and behavioral data using 25+ literacy assessments and neuroimaging techniques to assess statistical learning and language acquisition in children with/without autism
- Coordinated participant recruitment, scheduling, and study logistics for 100+ adult and child participants
- Developed scripts to clean, process, and analyze linguistic, eye-tracking, and behavioral experimental datasets using Python

Dialogue of Civilizations Researcher | Advisor: Dr. Gorka Basterretxea-Santiso — Spain
Northeastern University, World Languages and Cultures Department — *May 2025 – Jun 2025*
Project Title: La Lengua Perdida: Un Análisis Holístico del Árabe en el Paisaje Lingüístico de Granada

- Conducted field investigation throughout streets of Granada, catologuing linguistic landscape in research paper

Project Title: *Turisme, Turismo y Tourism*: Un Análisis Cuantitativo del Impacto del Turismo en el Paisaje Lingüístico de Barcelona

- Created and presented a research poster analyzing language use on public signage in a tourist street of Barcelona with a top-down/bottom-up framework

Project Title: El Paisaje Multilingüe, 15 Años Después: Percepciones y Preferencias de los Residentes de Donostia

- Interviewed Donostia residents in Spanish about city signage to collect perception and preference data; analyzed data and compiled findings into research paper

Industry Experience

People Operations Co-op — Charlestown, MA
Bevi — *Jan 2026 – May 2026*

- Owned end-to-end research-to-deployment lifecycle of an internal RAG AI chatbot, achieving 94% ticket deflection
- Developed and implemented an AI-native workflow to automate company-wide compensation reviews, reducing manual work time from weeks to minutes
- Translated data from company-wide engagement survey into 40+ reports and presentations that directly drove leadership's strategy changes

Data Science Intern — Waltham, MA
Waylens — *Jul 2025 – Aug 2025*

- Developed driver risk scores using a generalized linear model (AUC: 0.93) to assess individual driver safety levels from AI camera–derived telematics data
- Built and optimized scalable data cleaning and analysis pipelines for 500k+ rows using Python

Leadership Experience

Technical Product Manager — Boston, MA
Code4Community — *Dec 2025 – Present*

- Led the development and deployment of a grant-tracking dashboard with funding dashboard, grant portal, and cashflow modeling
- Planned weekly sprints, wrote tickets, conducted client meetings, and directed a cross-functional team of 9 developers and designers, ensuring on-time feature delivery
- Currently leading team of 10 through development of weather dashboard for Blue Hill Observatory from the ground up, developing user problem statements, defining product requirements, and planning roadmap with client

Data Analytics Coordinator — Boston, MA
Women's Interdisciplinary Society of Entrepreneurship — *Dec 2025 – May 2025*

- Built and launched WISE's first-ever data-driven Impact Report for external stakeholders to support grant and funding applications
- Designed surveys to collect & analyze data from 50+ participants across 6 programs, measuring organization KPIs

Technical Skills

Methods: Experimental design, survey design, user research, statistical and data analysis, data visualization
Tools: Python, R, SQL, Looker Studio, Qualtrics, RedCap, Gorilla, SPSS, AWS, Microsoft Office

Languages

Spanish (full professional) | **Mandarin** (native)
